## 3.0 Document Summary

This document defines the step by step instructions on how to install the ETK DVD onto your computer.

## 4.0 Step By Step Guide – Installing ETK

| Step | Action                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Notes                                              |
|------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------|
| 1    | <p>First of all, disable any virus scan program(s) that you may have on your computer. Disconnect from the internet before disabling your virus scan software!</p> <p>Disable any firewalls you may have. Sometimes firewalls prevent the installation from proceeding correctly. Often, if you have a firewall that is causing a problem, you will get a Java error dialog box. Be sure you have the latest version of Java installed on your computer.</p> <p>Do not ever close the command prompt box that opens. It needs to run in the background for the installation, it will close itself automatically at the end of install procedure.</p> <p>Remove any previous version of ETK Completely.</p> |                                                    |
| 2    | Insert the ETK DVD and navigate to the disk.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                    |
| 3    | Browse through the disk to <b>SETUP.EXE</b> and double click on it.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Chose your language and click next.                |
| 4    | A welcome dialog box will open-click next.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Now a Note dialog box will open, again click next. |
| 5    | The next box to open will ask you to choose your destination location. Click next, or change the location to your preferred location and click next.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                    |

### Minimum System Requirements

DVD-ROM Drive  
 Microsoft Windows  
 1.6GB Free Space  
 Not Vista Compatible

| Step | Action                                                                                                                                                                                                                                                                                                                                                                                        | Notes                                                                                                                     |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------|
| 6    | Another dialog box will open prompting you to select your program folder, again click next, or choose your preferred location and click next.                                                                                                                                                                                                                                                 |                                                                                                                           |
| 7    | The start copying files dialog box will open-click next.                                                                                                                                                                                                                                                                                                                                      | <i>Setup is now copying files to your computer. At this point, a command prompt box will open-<b>do not close it.</b></i> |
| 8    | Shortly, a port selection box will open. Only adjust the ports if you know what you are doing, otherwise, just click OK.                                                                                                                                                                                                                                                                      |                                                                                                                           |
| 9    | Next a properties dialog box will open, leave all fields blank and click OK.                                                                                                                                                                                                                                                                                                                  | <i>You cannot install the Rolls-Royce brand so select OK</i>                                                              |
| 10   | <b>You will now be prompted to select your market variation. It is imperative that you select <b>Europe</b> to avoid the necessity of a password. Furthermore, only with the Europe market variation will all available options be displayed. This is because many options were not available in the United States. Click OK.</b>                                                             |                                                                                                                           |
| 11   | Now you are prompted to select your installation type. Select "no data migration," and click OK.                                                                                                                                                                                                                                                                                              |                                                                                                                           |
| 12   | The next prompt asks you to create a new company. This is for administration purposes only, but must be completed in order to continue. To complete the fields, enter any company name (i.e. home, work, name, etc.). Now enter an associate ID-entering a "1" is sufficient for this. After you have entered a company name and associate ID, click save. After successful saving, click OK. |                                                                                                                           |
| 13   | This will open a dialog box stating that the procedure has been completed successfully-click exit.                                                                                                                                                                                                                                                                                            |                                                                                                                           |
| 14   | You now need to select your DVD-ROM drive. In order to do this, scroll down to the "my computer" folder and expand it by clicking on the "+". Now click once on your DVD-ROM drive to highlight it and click OK to start loading the parts database.                                                                                                                                          |                                                                                                                           |
| 15   | Now, you will see a notice that the "parts data have been read in successfully". Click OK.                                                                                                                                                                                                                                                                                                    | <i>You will be notified that the installation is complete. Click OK.</i>                                                  |
| 16   | The command prompt will close automatically. After it closes, the installation is complete.                                                                                                                                                                                                                                                                                                   |                                                                                                                           |

## 5.0 Running The ETK Program

To run the program, open ETK (local). The first time will take a few minutes, but after that, the program will open a lot quicker.

### Minimum System Requirements

DVD-ROM Drive  
Microsoft Windows  
1.6GB Free Space  
Not Vista Compatible

## 6.0 ETK Price Database Integration - *Optional*

After you have downloaded the price database (download both zip files) at <http://www.gaming-ladders.co.uk/satnav/contact.html> (let me know if the link is not available), scan for viruses with your virus scan program.

**Do not unzip the files**

Now, open ETK Admin. A DOS window will open and after a moment the ETK Admin window will open. Click on "DATA" and then "Load Prices..." and direct the dialog box to the location where you have saved the price database .zip files. Click OK and the program will begin loading the price database(s) automatically. This will take several minutes.

When it is done, you will be notified that the price database has been loaded successfully. You may delete the price database from your desktop or wherever you saved it too because it is now saved in the ETK program itself.

## 7.0 ETK Overview And Models Covered

To get information specific to your individual vehicle you simply enter your vehicles VIN number and the software provides very clear and concise easy to follow parts list, including line diagram graphics allowing each part to be shown. This is the same software the dealers use to find your parts. You can find a part either by the vehicles unique VIN number or by vehicle Type, or by using the graphical Parts search by group. There are lots of new features in this version including a tips and tricks page to point out some of the capabilities of the program. One great new feature is the ability to email parts lists and part diagrams right from the program (you must set up a mail server in configuration for this option). This version includes the new 3 Series E90, E91, E92 & E93 and the new X5 E70!

The specific models are listed below.

| Motorcycle | BMW Series                  | Mini Series   |
|------------|-----------------------------|---------------|
| C1         | 1 Series E81, E82, E87      | R50           |
| F Series   | 3 Series E30, E36, E46, E90 | R52           |
| K Series   | 5 Series E34, E39, E60, E61 | R55           |
| R Series   | 6 Series E63, E64           | R56           |
| Vintage    | 7 Series E32, E38, E65, E66 | Mini One      |
|            | 8 Series E31                | Mini Cooper   |
|            | X3 Series E83, E83 LCI      | Mini Cooper S |
|            | X5 Series E53, E70          |               |
|            | Z3 Series E36               |               |
|            | Z4 Series E85, E86          |               |
|            | Z8 Series E52               |               |
|            | Vintage Cars                |               |
